FOR IMMEDIATE RELEASE

COVID-19 DATA UPDATE

Although many people in the Barren River District have been vaccinated, the majority of the population remains unvaccinated. COVID-19 vaccines are safe and effective at preventing severe illness and death. Vaccination also reduces the risk of people spreading the virus. The COVID-19 vaccine teaches your body how to fight off the virus in case you become infected. If you are vaccinated and you do catch the virus, you are much less likely to be hospitalized.

*Percentages of total vaccinated population decrease caused by data errors being corrected in the state system.

County	Total Vaccinated Population
Barren	48.59%
Butler	46.30%
Edmonson	36.31%
Hart	37.68%
Logan	54.23%
Metcalfe	42.05%
Simpson	53.79%
Warren	41.27%

We strongly encourage everyone who is eligible to get the vaccine do so as soon as possible. The COVID-19 vaccine is available at multiple locations in the area. To find a vaccine near you, visit <https://www.vaccines.gov/search/>. If you are 18 years of age or older and would like schedule vaccination with the Barren River District Health Department, call your local health department and press option 1. Clinic contact information is listed at the end of the press release.

DISTRICT HEALTH DEPARTMENT 

According to data from the past seven days, all eight counties in the Barren River District are considered in the Red Zone for COVID-19 transmission. The Red Zone is considered critical, with average daily cases more than 25 per every 100,000 people. The seven-day incidence rate is calculated by taking the total number of cases in each county over the past seven days, divided by seven to get a daily average, divided by the U.S. census bureau county population and multiplied by 100,000 to get the incidence per 100,000 people.
